

CLAIMS

1. A switched input video device comprising:

a switched input;

at least one of video improvement circuitry and transcoder circuitry; and

a switch for communicating a switched input to at least one of the video improvement circuitry and the transcoder circuitry.
2. The switched input video device as recited in claim 1, further comprising an internal medial player and wherein the switch selects either the internal medial player or the switched input.
3. The switched input video device as recited in claim 1, wherein the switch is externally controlled.
4. The switched input video device as recited in claim 1, wherein the switch is remotely controlled.
5. The switched input video device as recited in claim 1, wherein the switch is automatically controlled.
